

Styrsöbolaget Älvsnabben

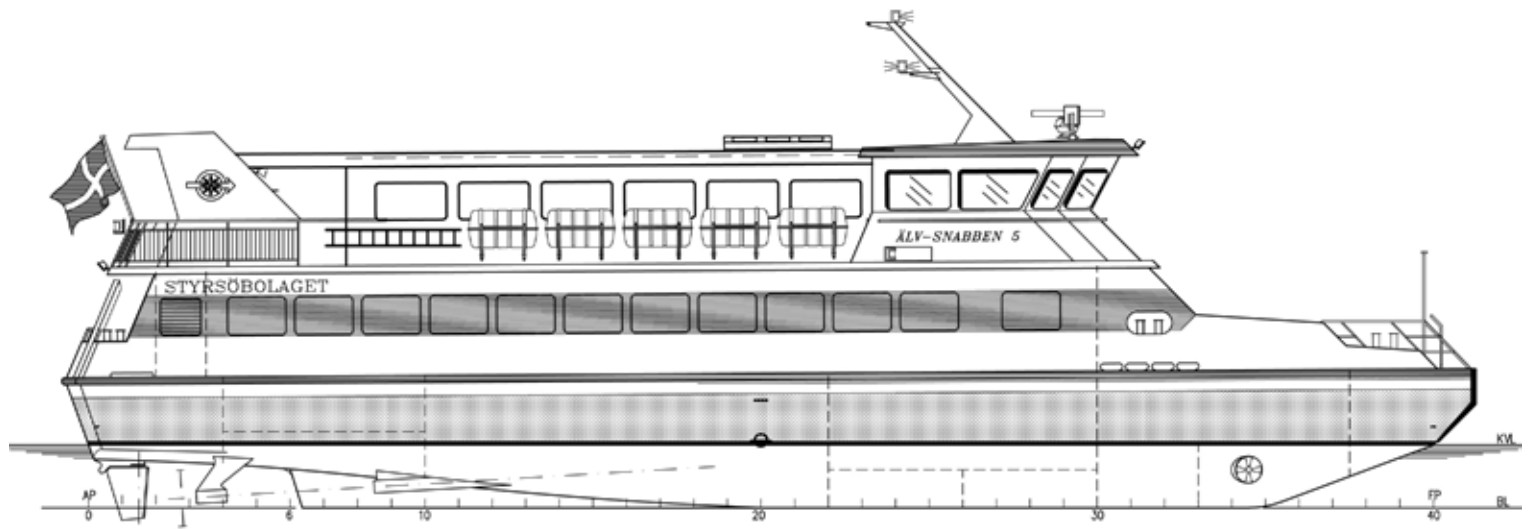

Public transport ferry

GENERAL

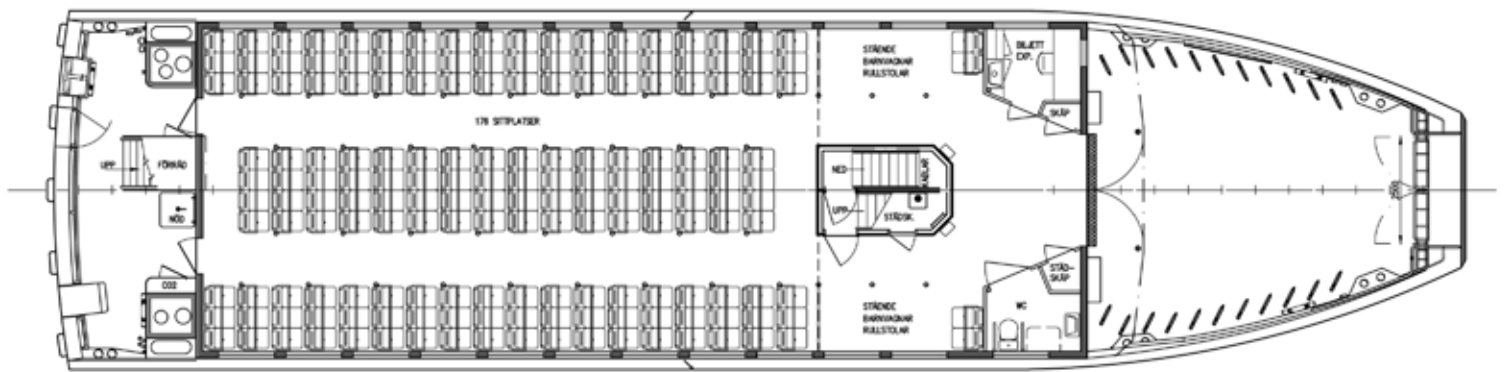

Älvsnabben 4 and 5 were constructed due to increased demand on passenger traffic in the harbour of Gothenburg. The boats serve on a daily basis and can take passengers and bicycles. Passengers can enjoy the view from either a larger saloon with 148 seats or a sundeck with 80 seats. The boat is built in aluminium but strengthened in order to stand the icy conditions during the winter.

MAIN FIGURES

Top speed	13 knots
Passengers	448
Bicycles	40

SIDOVY

HUVUDDÄCK / SALONG

MAIN PARTICULARS

Length over all	31.6 m	Main engine	2 x Volvo Penta
Length between PP	30.0 m		D12-450 / 2 x 330 kw
