

# FKAB B12

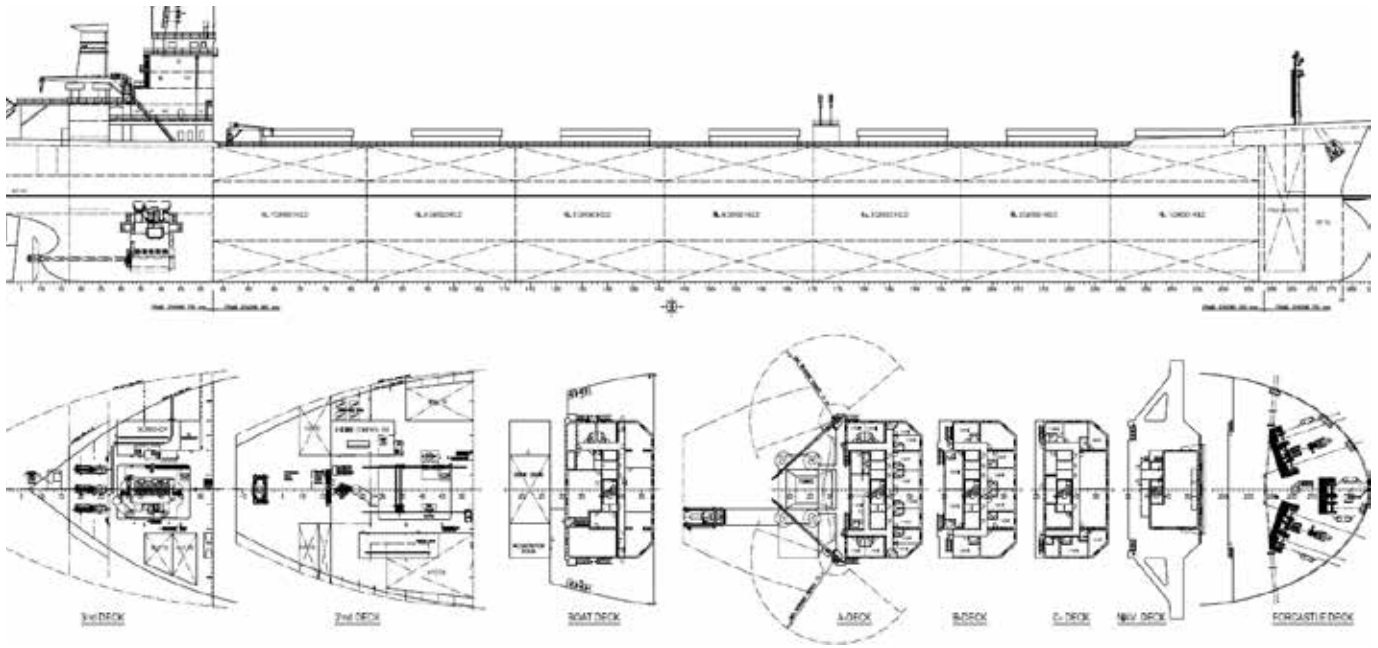

133 000 DWT Bulk carrier

## GENERAL

The FKAB B12 Design sets a new standard in the midsize caper ship segment. She combines high carrying capacity with main particulars adapted to most ports in Europe, India and South America. The design fully complies with the new CSR-rules and all aspects of environmental concern have been taken into account, such as ballast water treatment, coating, low sulphur bunker, etc. She is able to carry different kinds of bulk cargo such as grain, ore or coal.

## MAIN FIGURES

Cargo hold capacity	5 000 000 cuft
Deadweight at scantling draught	133 000 tonnes
Number of holds	7

Length over all	245.0 m	Cubic capacity	142 200 m <sup>3</sup>
Length between PP	235.3 m	Heavy fuel oil capacity	4 620 m <sup>3</sup>
Breadth mld	44.00 m	Ballast water capacity	66 300 m <sup>3</sup>
Depth mld	23.70 m	Main engine	MCR 13 560 kW x 105 rpm
Draught design	15.0 m	Service speed	14.2 knots
Corresponding deadweight	110 000 tonnes	Endurance	25 000 nm
Draught scantling	17.40 m	Accommodation	25 pers
Corresponding deadweight	133 000 tonnes	Tonnage (GT/NT)	70 700/41 700
