

# Vägverket Färjerederiet Sjöliften

## Unmanned trail ferry

### GENERAL

The cable ferry "Sjöliften" is an environmentally friendly solution for short distance passenger transportation. It is an unmanned vehicle and is operated by the passengers themselves. The cable is driven by electricity and located at the bottom of the watercourse, which means that the transportation route is available for other vessels to cross. Its flexibility makes it easily adaptable for various locations and transportations.

### MAIN FIGURES

Passengers	12
Max load	1 200 kg

## MAIN PARTICULARS

Length over all	6.0 m	Max load	1 200 kg
Breadth	5.0 m	Passengers	12
Depth to passenger deck	1.25 m	Speed	1.6 knots
Draught design	0.6 m		

## CLASS
